Instructions: Please respond to all questions as if you were wearing the prosthetic leg(s) you use most days. If you would normally use a cane, crutch, or walker to perform the task, please answer the questions as if you were using that device.

Please choose "unable to do" if you:

- Would need help from another person to complete the task,
- Would need a wheelchair or scooter to complete the task, or
- Feel the task may be unsafe for you

Please mark one box per row.

Scoring the PLUS-M[™] 12-Item Short Form

PLUS-MTM short forms are scored with a <u>T-score</u>. To find the T-score, sum scores for all responses on the short form. This is the <u>raw score</u>. Do not use the raw score for any purpose other than to look up the T-score using the conversion table below. If any questions on the short form are <u>unanswered</u>, refer to the PLUS-MTM Short Form Users Guide for instructions on scoring *incomplete* short forms.

PLUS-M™ T-score

For T-scores with standard error (SE) greater than 3.0, use of the PLUS-M[™] CAT (www.plus-m.org) is recommended to obtain better measurement precision. Percentile indicates the percent of the PLUS-M[™] development sample that reported lower mobility than is reflected by the corresponding T-Score. For more information on interpretation of PLUS-M[™] T-scores, please refer to the PLUS-M[™] Short Form Users Guide.
